PROFESSIONAL SUMMARY

Practical and motivated BSc graduate in Project Management Technology with hands-on experience across construction, automotive repair, advertising, academic writing support, and software development. Self-driven learner with a diverse skill set spanning 3D modelling, Android development, technical analysis, and project coordination. Eager to apply a multidisciplinary background to solve real-world problems, particularly across African markets.

WORK EXPERIENCE

Freelance Academic Project Consultant

Self-Employed

July 2025 – Present

- Assist undergraduate students in researching, structuring, and writing their final year projects.
- Review and edit academic documents for clarity, coherence, and compliance with project guidelines.
- Guide clients through research methodology, data presentation, and referencing standards.
- Managed multiple client projects simultaneously, delivering work within agreed timelines.

Product Manager

Mogosbrand Advertisement Agency — Lagos

February 2022 – December 2024

- Coordinated tasks across multiple teams during weekly and mid-week meetings.
- Documented meeting discussions and tracked execution of assigned tasks.
- Worked with designers, HR, content writers, and management to support project progress.
- Prepared updates and progress summaries for internal stakeholders.
- Communicated with clients to gather requirements and follow up on deliverables.

Apprentice Mechanic

Automotive Workshop — Ogun State

2024 – Present

- Hands-on vehicle diagnostics, maintenance, and repair under supervision.
- Developed practical understanding of automotive systems and fault diagnosis.

Industrial Training — Construction Project Support

Gaton Africa Limited — Ikoyi, Lagos

July 2024 – October 2024

- Recorded daily site activities and prepared log entries.
- Monitored material usage for concrete mixes following specific ratios.
- Assisted in coordinating site teams including carpenters, iron benders, and electricians.
- Supported project supervisors by documenting progress and reporting issues.

PROJECTS

Volami — Family Safety & Location App

Android Development · Firebase · OpenStreetMap

2024 – Present

- Building a real-time family safety and location sharing Android app targeting African families.
- Implemented Firebase Auth (OTP + Google Sign-In), Firestore, and Storage.
- Designed WhatsApp-style chat UI, emergency contacts system, and user profile management.

Chess Repertoire System

Personal Project — Shipped

- Built a personal tool to organise and study chess opening lines and repertoire.
